Major enhancement to the delivery and return screens. **Improved:**

- Data handling
- Data integrity
- User interface

Copyright © Scaffolding Software

iRent® (Classic) : 9.67 (August, 2025)

Delivery and return docket Photos.

Added option to include photos to delivery and return dockets.

Enhancements:

Added “Physical Weight” textbox to Goods Inward screen.

Replaced "Items" column with “Physical Weight” in unprocessed returns report.

Added new Job Movements report under Reports ==> Stock Reports menu.

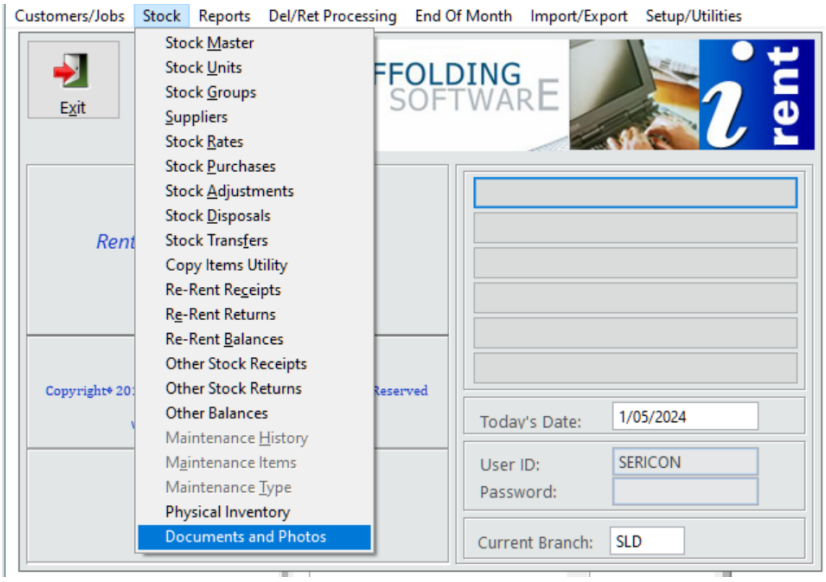
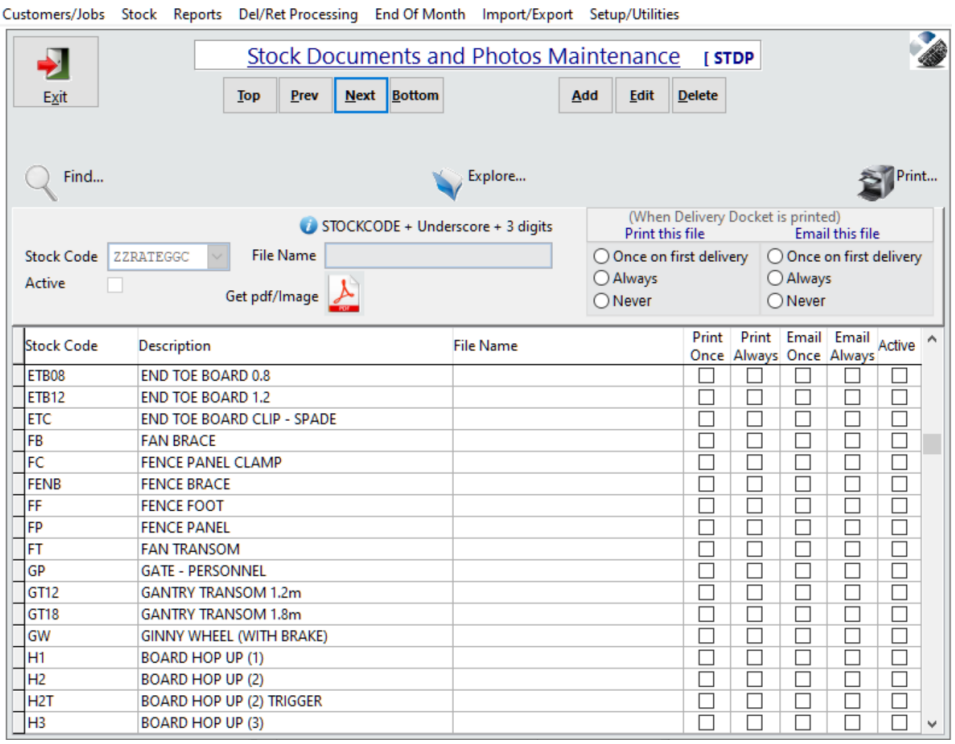
iRent® (Classic) : 9.64 (April, 2024)

Stock Documents and Photos.

Allows you to print documents and photos for each item when making a delivery. These could be installation instructions, safety details etc,



You can use pdf, jpg, jpeg, png and bmp files.



Copyright © Scaffolding Software

www.scaffoldingsoftware.com

Enhancements:

Enhanced Stock Item Catalog Report to handle jpg, jpeg, png and bmp.

Enhanced to enable emailing Tech Support and Customer with issue details as they occur

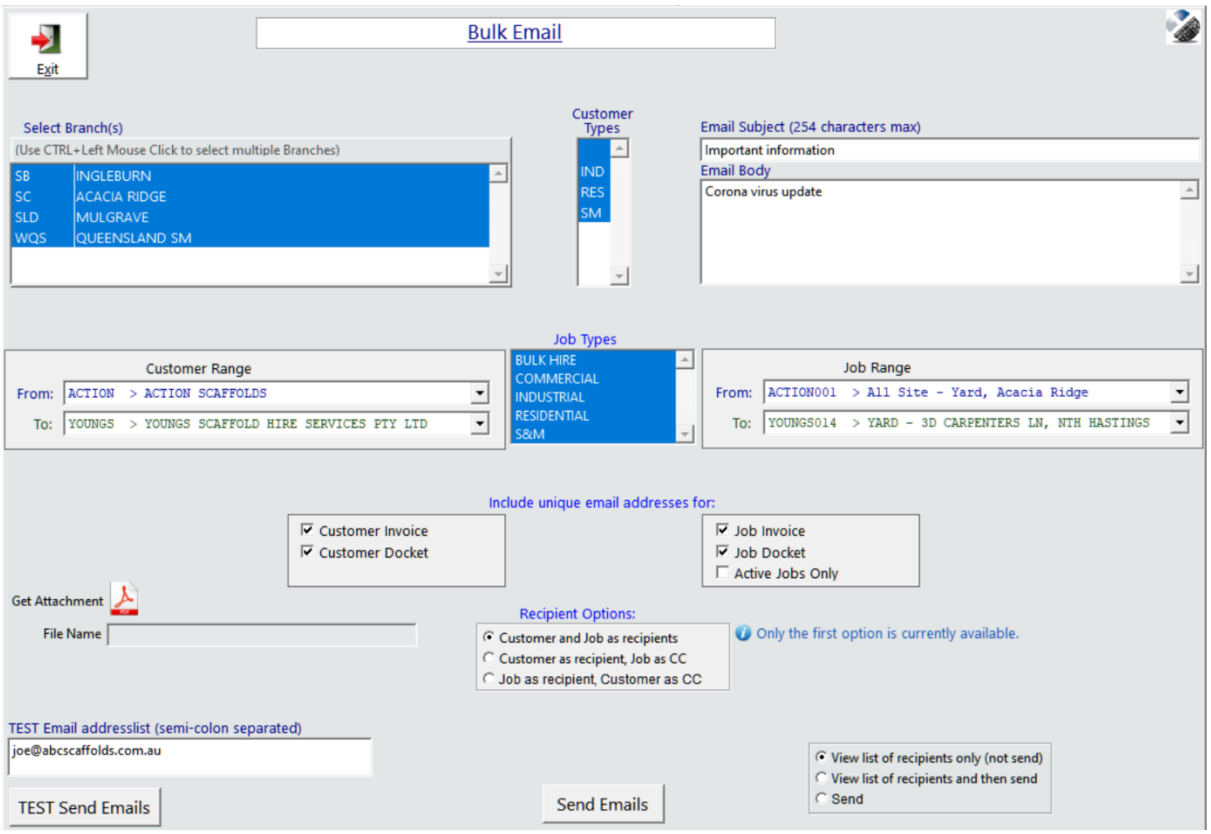
Enhanced customer form to include a default “Invoice By” option for jobs.

Copyright © Scaffolding Software

iRent® (Classic) : 9.50 (April, 2020) (Limited availability)

Bulk Email facility.

You can send bulk emails to your customers filtering on branch, customer range, customer type(s) and job range.



Copyright © Scaffolding Software

iRent® (Classic) : 9.49 (December, 2019)

Enhancements.

Setup changes are now “hot”. That is, changes made in the setup form are immediately available in the main module and there is no need to exit iRent® and restart.

Fixed issue with the Job History report when changing branches in the same session

Fixed issue with deleted rate codes being displayed in Job form when selecting a Job rate code.

In Rate Codes form, prevents deletion of a rate code if it is in use.

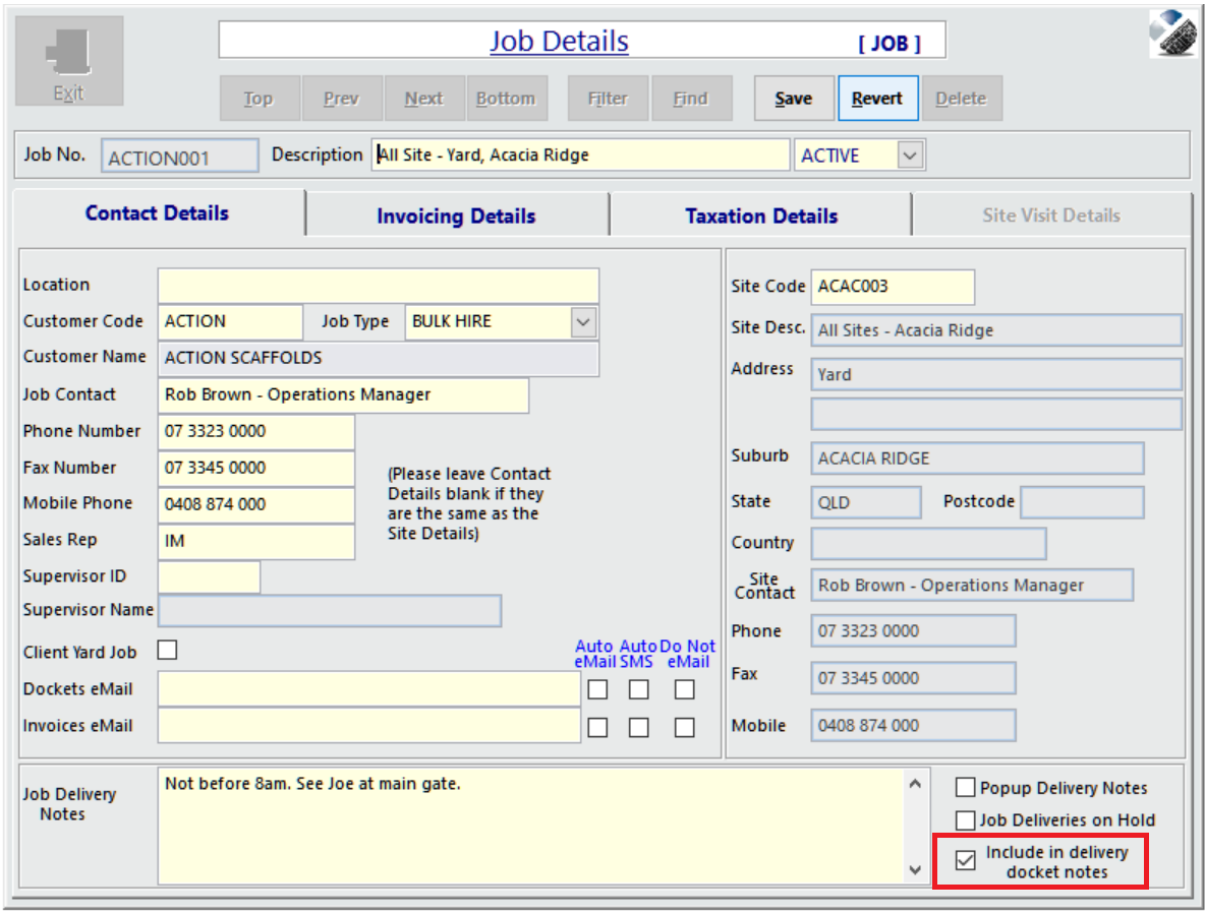
Disabled “Advanced Indexing” option.

Copyright © Scaffolding Software

iRent® (Classic) : 9.47 (September, 2019)

Added “Include in docket delivery notes” option to jobs.

If this option is ticked then the Job Delivery Notes will be added to any docket delivery notes.

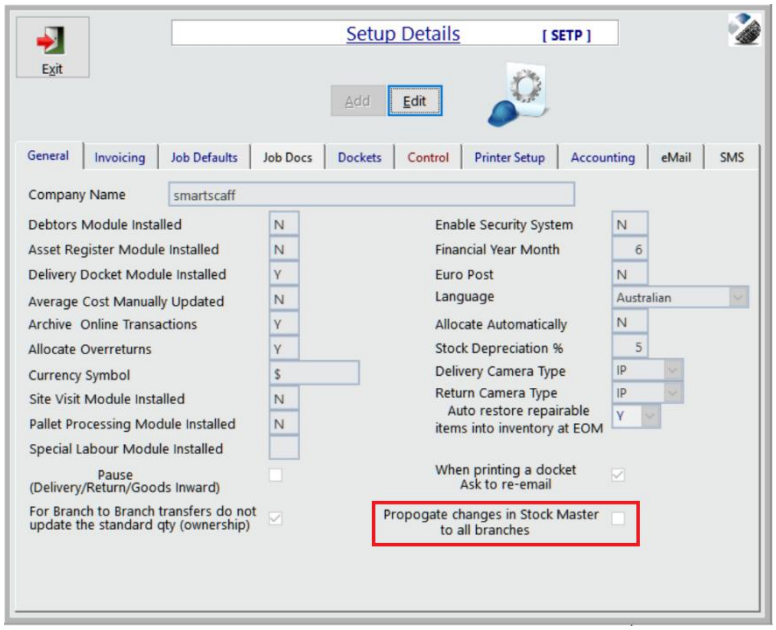


Copyright © Scaffolding Software

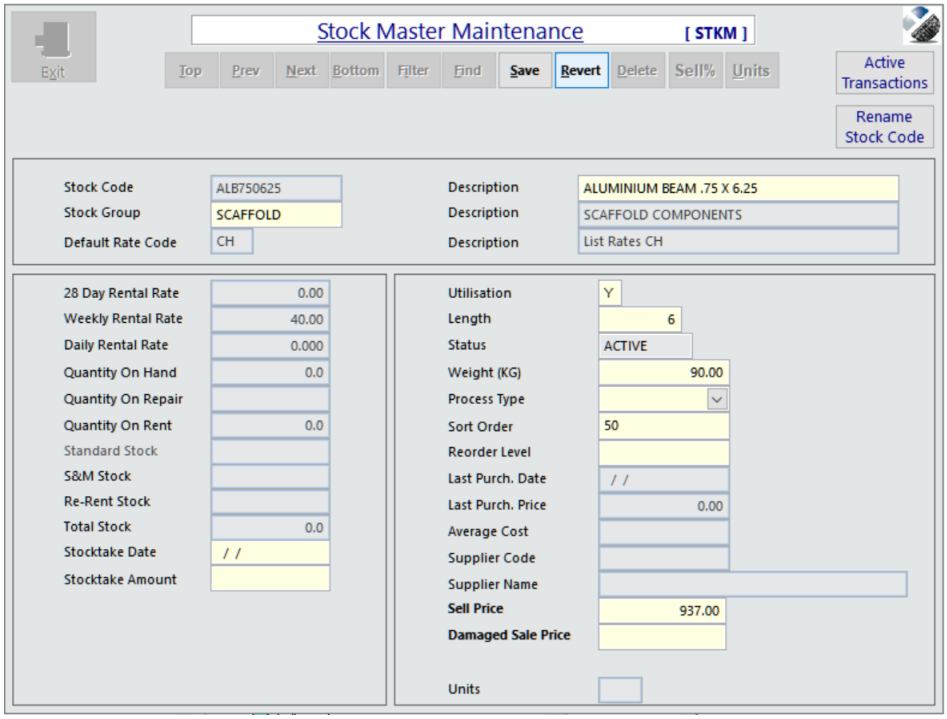
iRent® (Classic) : 9.44 (July, 2019)

Stock Master changes can propagate to all other branches.

When adding/deleting stock items or making changes to item details, the changes can ***optionally*** propagate to all other branches.



The details that are propagated are highlighted in yellow below.

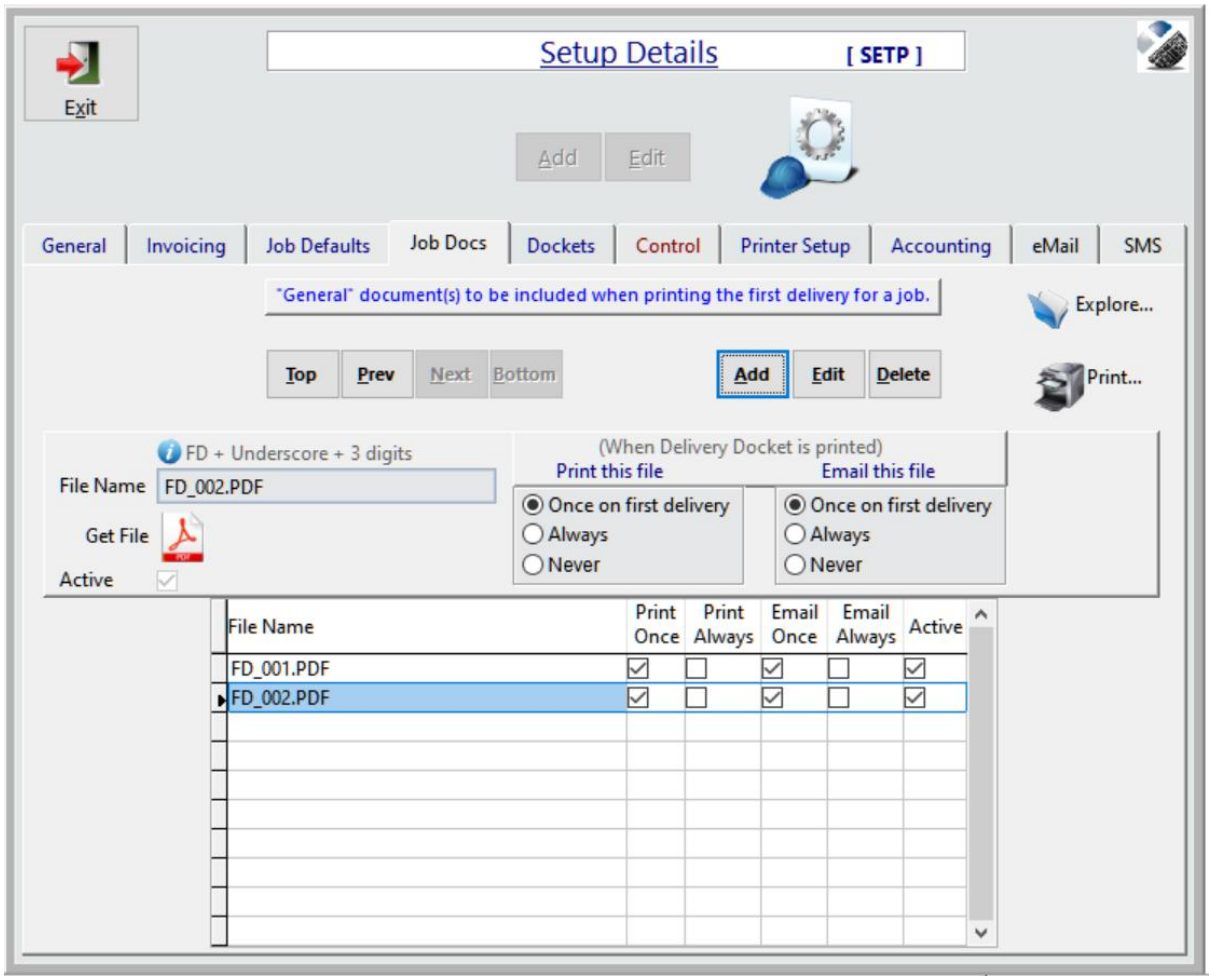


Copyright © Scaffolding Software

iRent® (Classic) : 9.40 (May, 2019) (Limited availability)

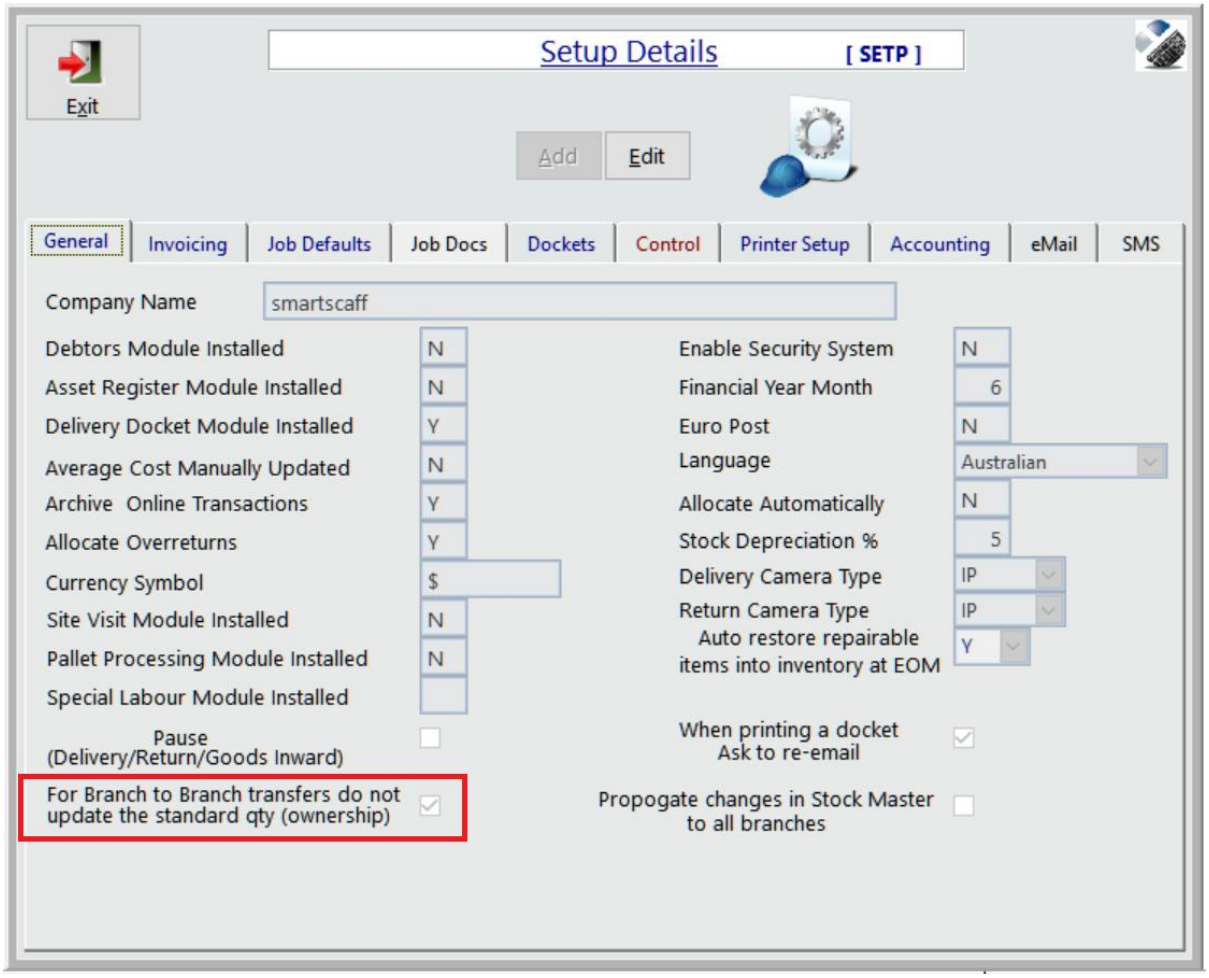
New: delivery dockets can include documents and/or photos.

The ***first*** delivery to a job may have documents and/or photos printed along with the docket. The documents/photos may be for assembly and safety instructions etc.



Copyright © Scaffolding Software

When transferring items between branches you may optionally not update the ownership (standard qty) of the items in each branch.



Enhancements

- Disabled the camera button in the delivery and goods inward forms when editing.
- Fixed an issue in the Re-Rent balances report when using the default ORDER BY selection.
- Fixed an issue in the Consolidated Stock report to enable the stock code range filter.
- Fixed an issue in the Consolidated Stock report when no branches are selected.

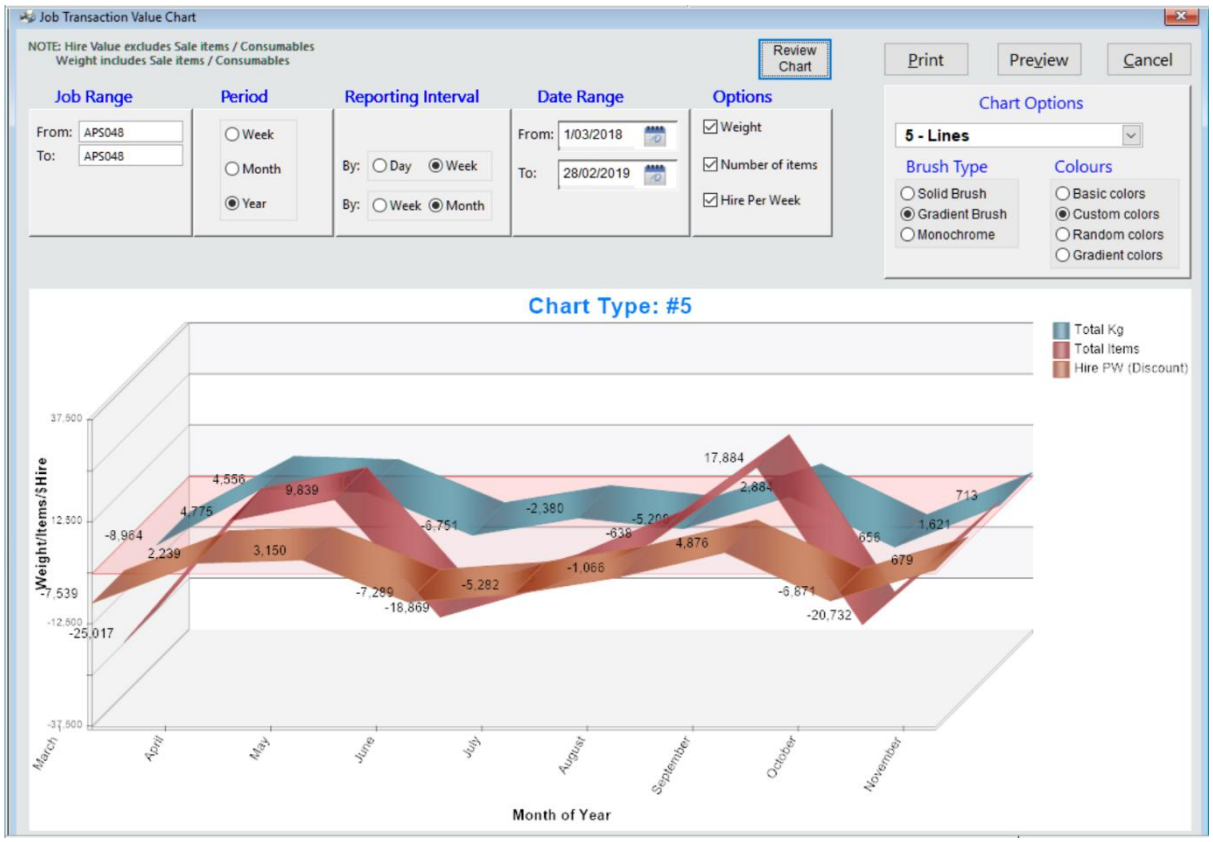
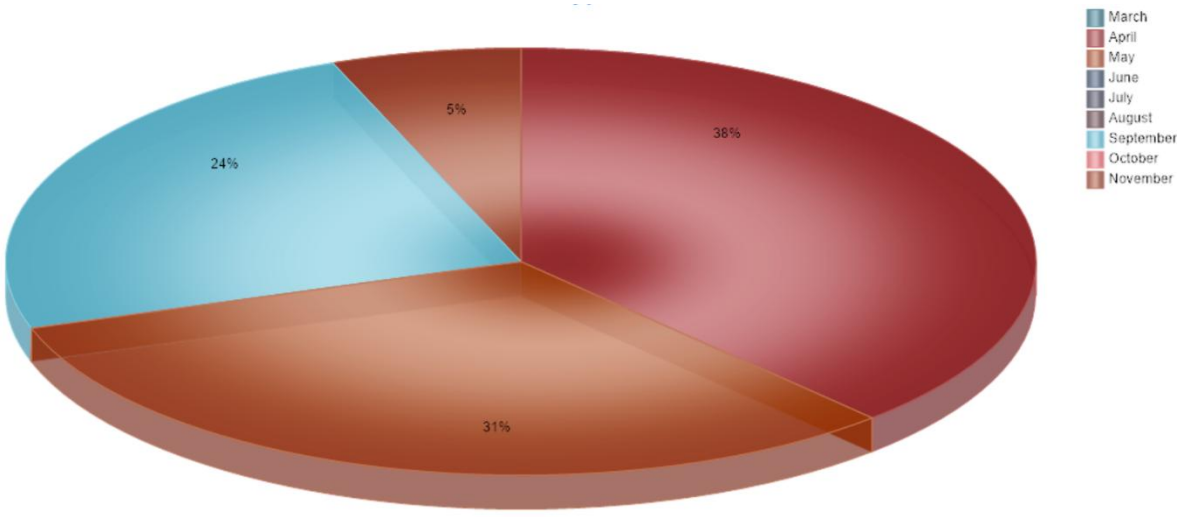
iRent® (Classic) : 9.37 (March, 2019)

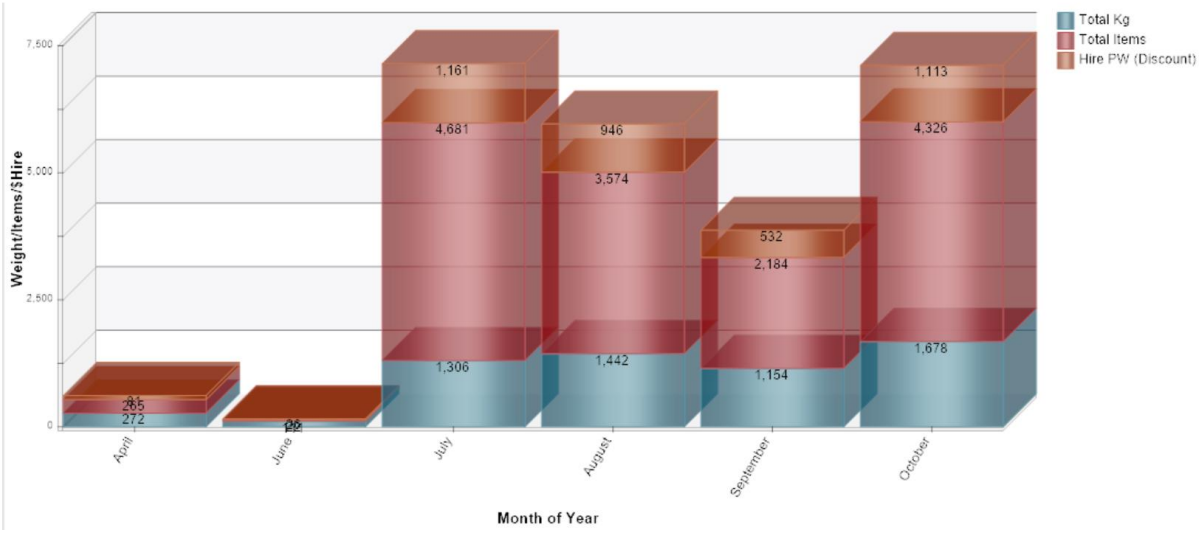
New Job Transaction Value chart report

This report graphs transaction values for a job over 1 week / 1 month (by day or week) and 1 or more years (by week or month). You can select from different types of graphs. It reports weight, number of items and hire value (discounted if that applies). Samples are below.



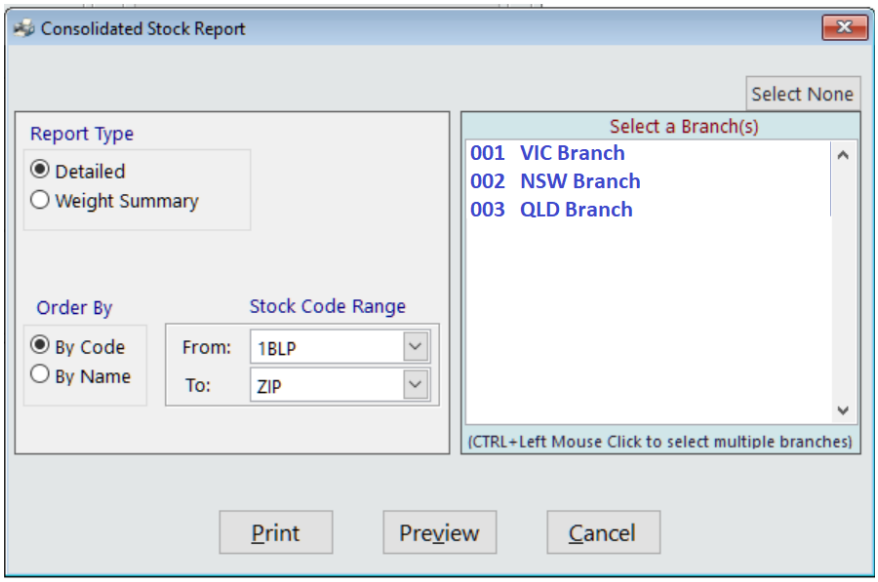


Copyright © Scaffolding Software



New Consolidated Stock report

This report consolidates your stock level details across selected branches. It reports Standard Stock (stock that you own), Other Stock (eg Storage and Maintenance), Re-Rent Stock, On Repair Stock, On Rent Stock and On Hand Stock in each branch and the totals across the selected branches.



Copyright © Scaffolding Software

Detailed sample is below:

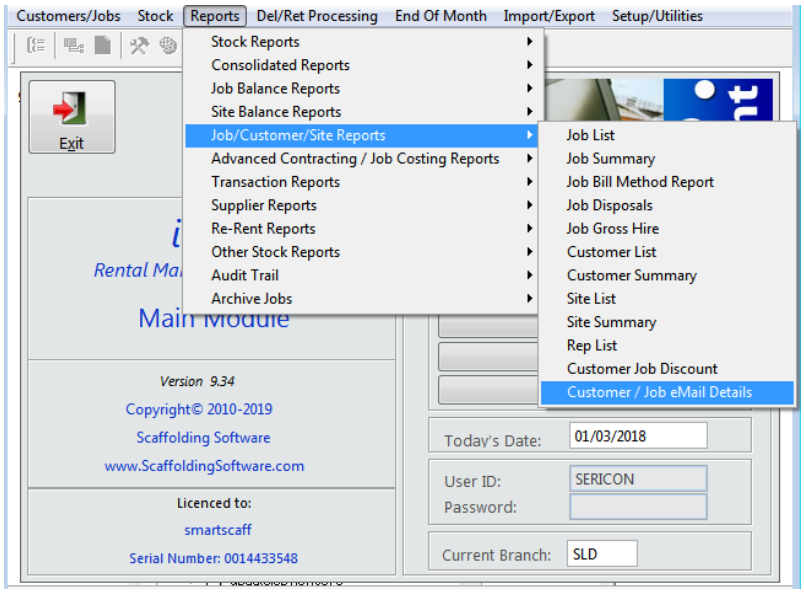
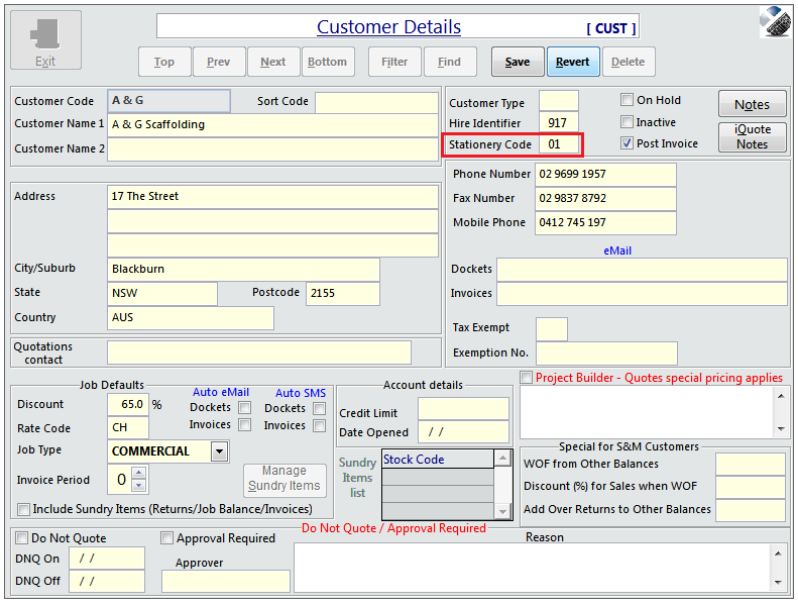
iRent® (Classic) : 9.34 (August, 2018)

Added new Customer and Job email details reports



Added ability to use a customised docket and tag layouts



Enhanced standard and consolidated utilization reports

Added a weight column and total weight.

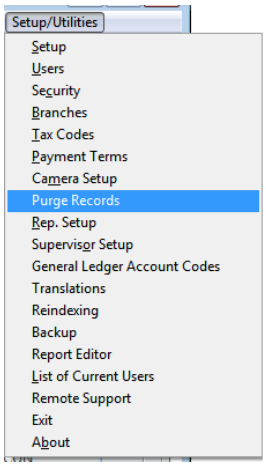
Copyright © Scaffolding Software

www.scaffoldingsoftware.com

iRent® (Classic) : 9.27 (September, 2017)

New “Purge” old records process

To improve performance the new “Purge” module enables you to cleanup all old records that are related to finished jobs.

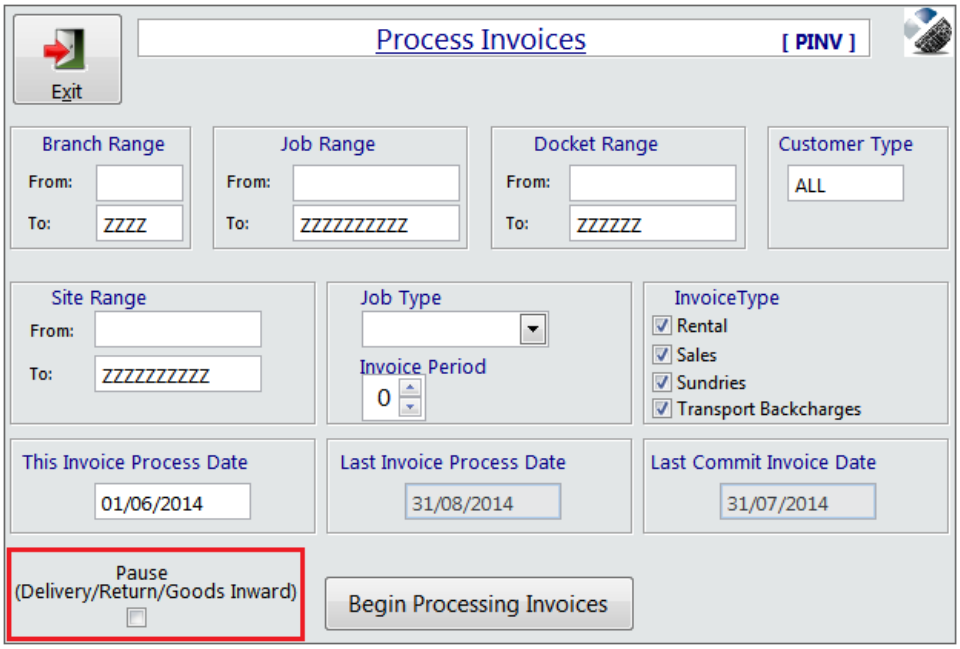


Improved indexing of existing data

The database indexes have been tuned to improve performance

Process invoices and dockets at the same time

Previously, processing invoices prevented adding new dockets. Now you can process invoices and add dockets at the same time.



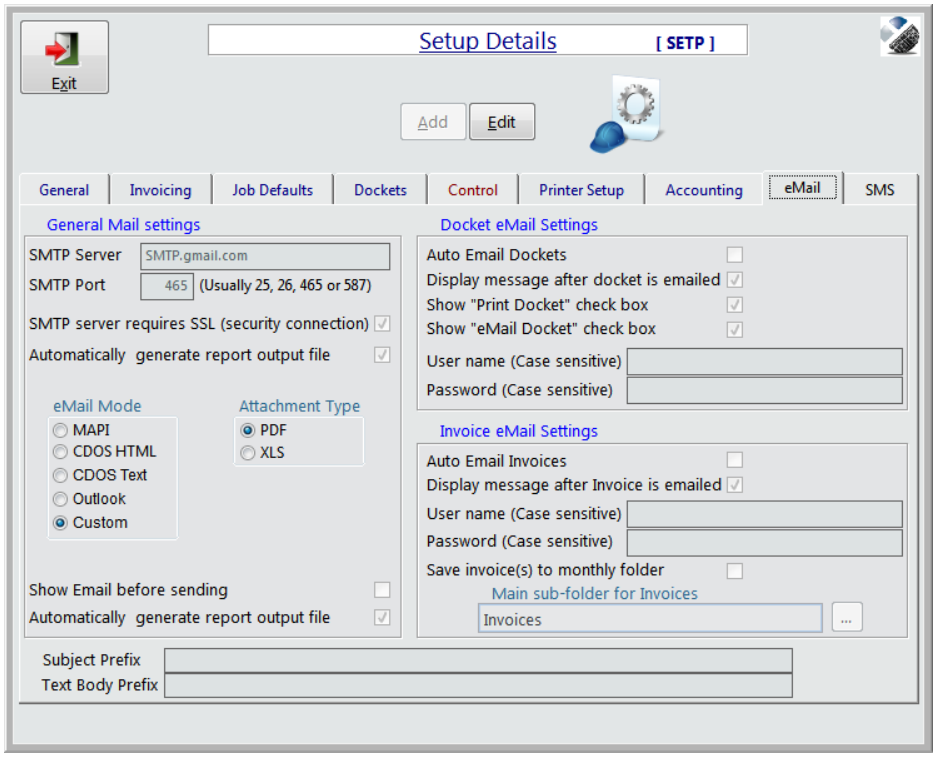
Copyright © Scaffolding Software

Copyright © Scaffolding Software

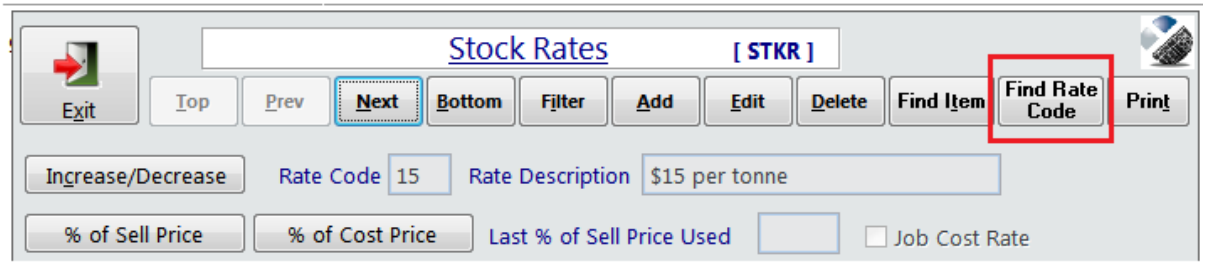
iRent® (Classic) : 9.11 (May, 2017)

Auto emailing of dockets and invoices

This is a new feature that is available on request. It allows you to automatically email your dockets and invoices to selected customers.



Added "Find Rate Code" and rates report to rate form



Rate Codes Report

Branch: **SLD**

Rate Code: **15**

AG	ACCESS GATE (EXTENDABLE)	15.00		☒	☑

Copyright © Scaffolding Software

Enhanced driver details

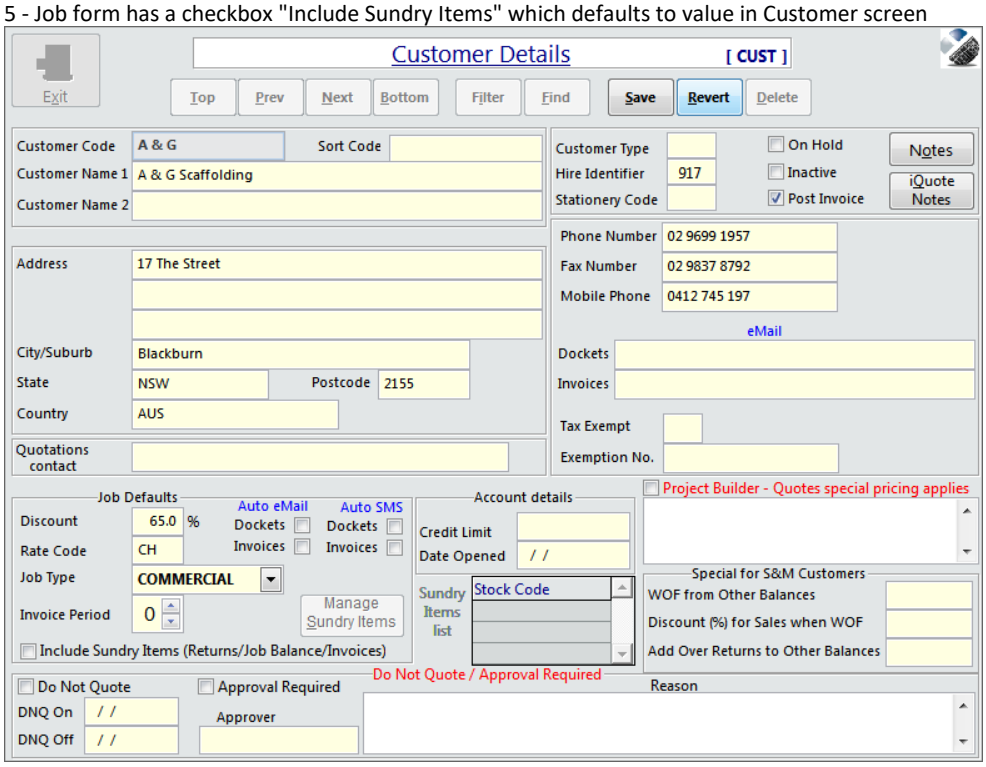
The driver details are now by Branch and a new “Company” option has been added. This means that when selecting a transport company/driver you will be able to easily select the correct companies/drivers for the logged in Branch.

Copyright © Scaffolding Software

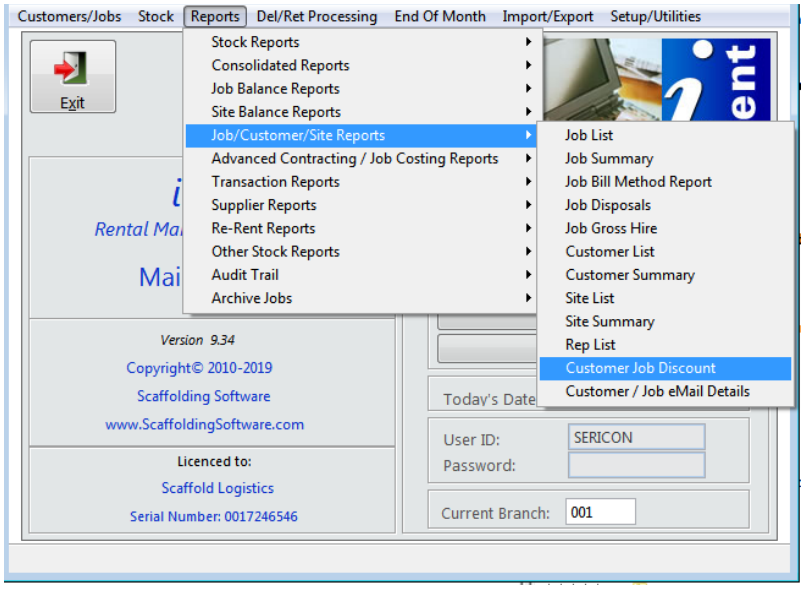
iRent® (Classic) : 9.11 (February, 2017)

New “Consumables” handling

1 - May be Returned just like rental items
2 - Credit given for returned "Consumable" items on rental invoice
3 - "Consumable" items included in Standard job balance
4 - Customer screen has an "Include Sundry Items" as a job default option
5 - Job form has a checkbox "Include Sundry Items" which defaults to value in Customer screen

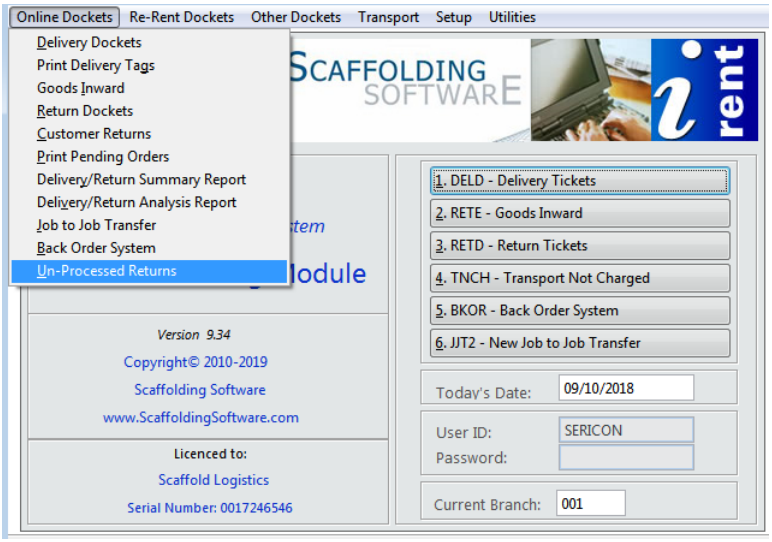


Added new Customer Job Discount report



Copyright © Scaffolding Software
www.scaffoldingsoftware.com

Added new Un-Processed returns report

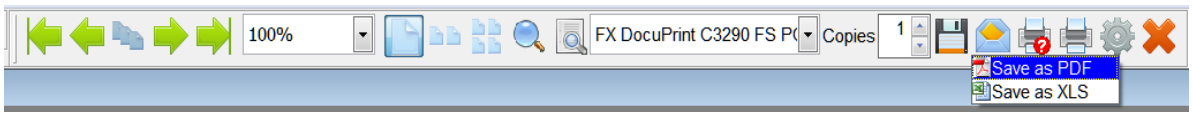


Copyright © Scaffolding Software

iRent® (Classic) : 9.05 (June, 2016)

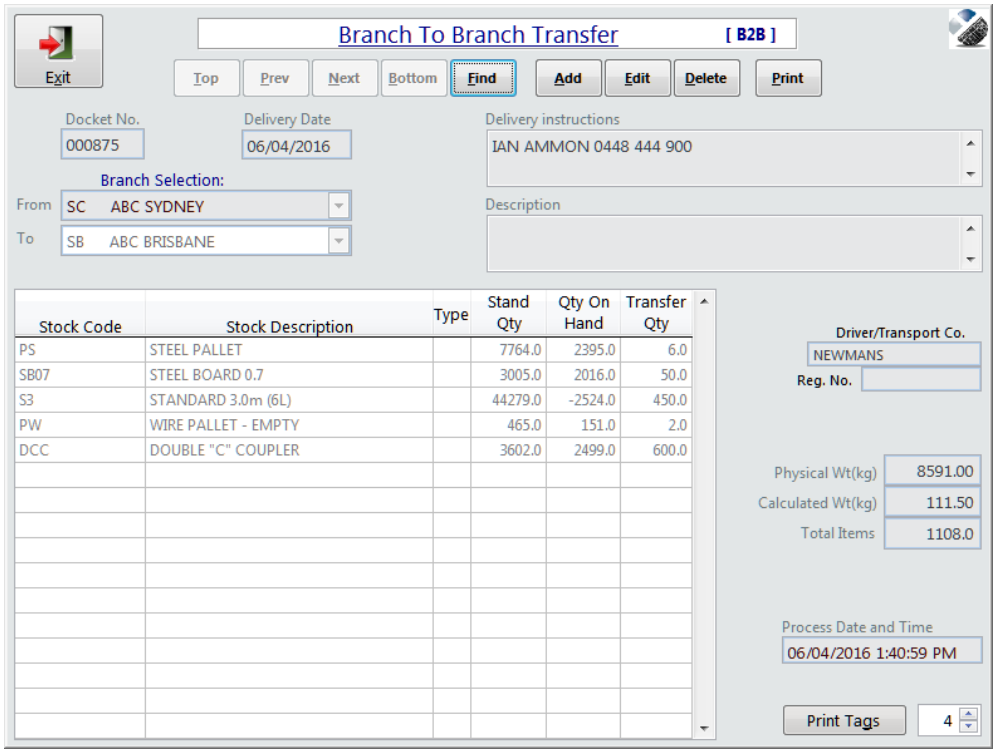
New report toolbar

New report toolbar with powerful output and report type options. You may save any report to Excel or pdf.



New Branch to Branch stock transfers

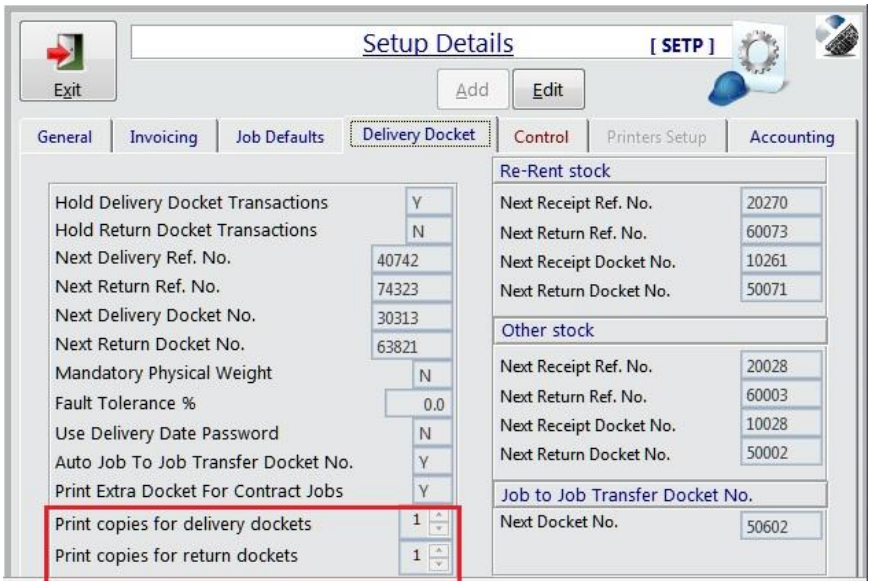
Now allows multiple items to be transferred in one transaction!



Copyright © Scaffolding Software

Set number of copies for delivery and return dockets

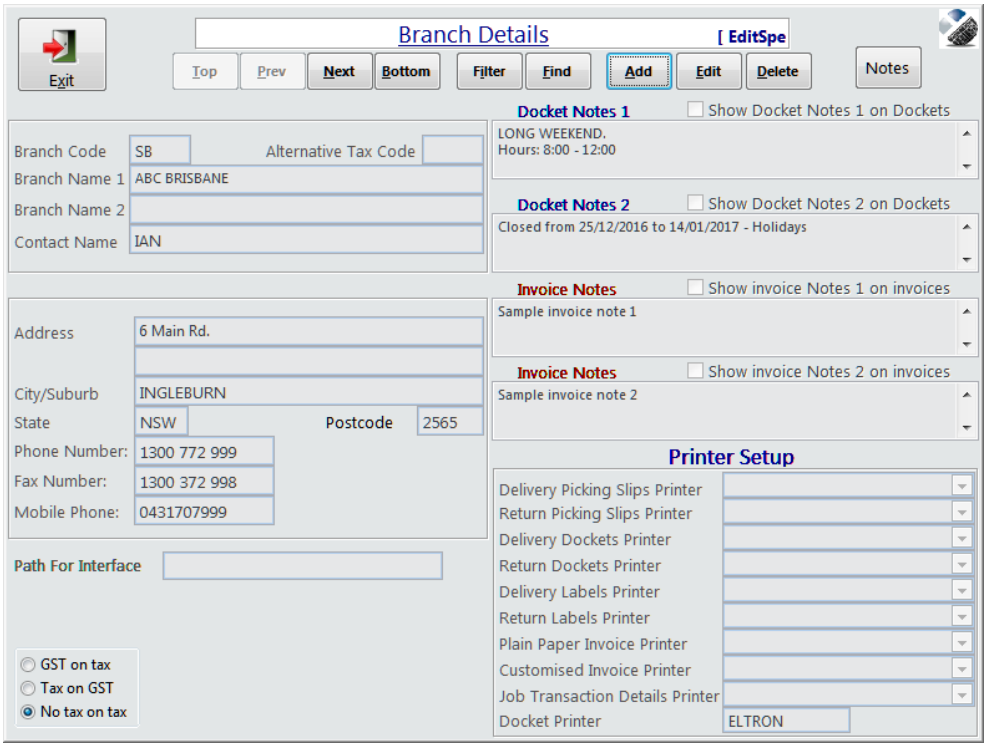
Set the number of print copies for delivery and return dockets.



Additional report messages

New options in branch screen to allow up to 2 messages to be printed on reports. For example, “Happy new year” printed on dockets.

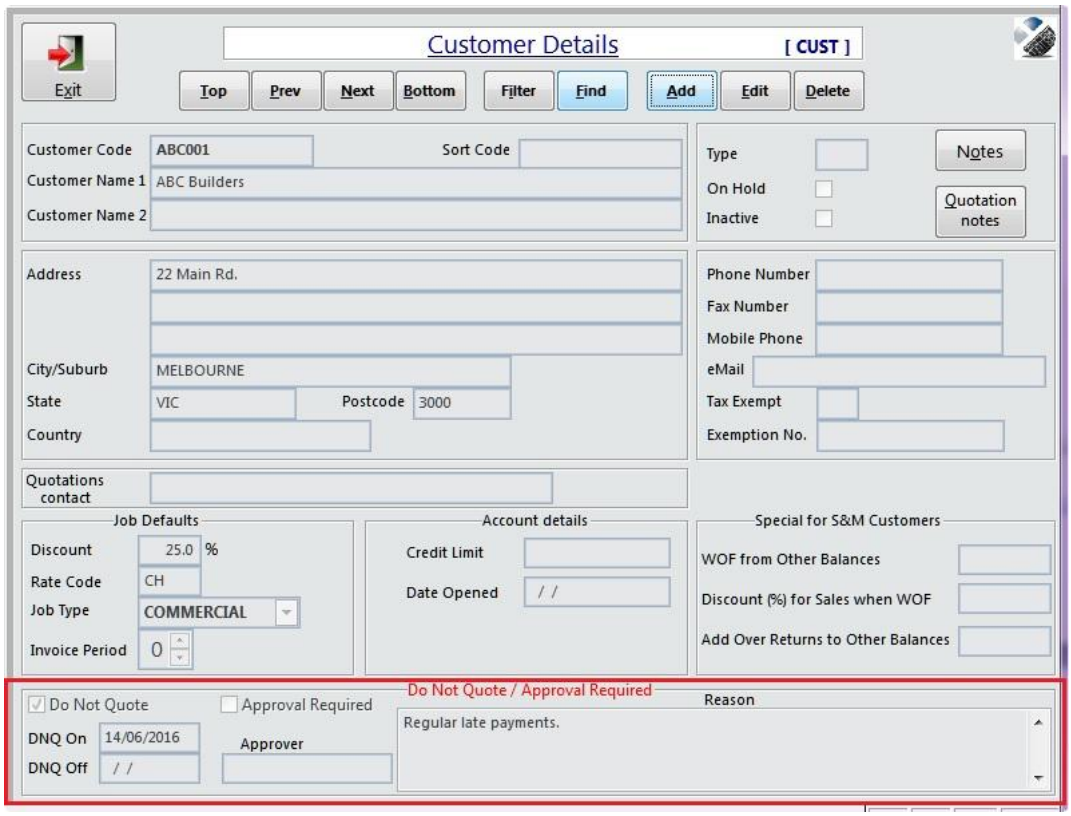
New options in branch screen to allow up to 2 messages to be printed on invoices. For example, “Alternative payment method: ”



Copyright © Scaffolding Software

Manage delinquent customers

New customer screen options to flag customers as “Do Not Quote” or “Approval required”. This currently integrates with iQuote® only but can be included in iRent® if requested.



Invoice processing

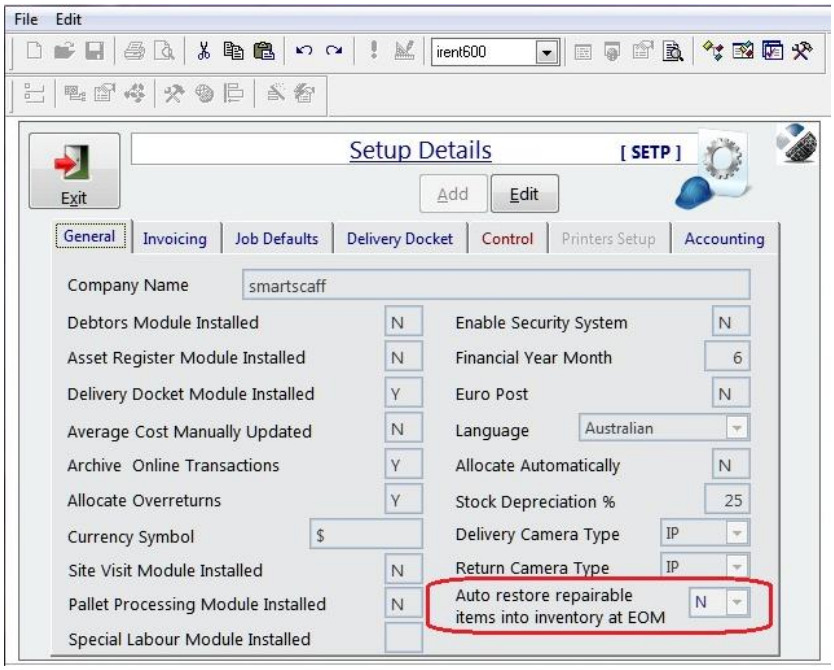
Processing invoicing used to require that all users were out of iRent®. However, it now does not require all users to be out of iRent® if users are not adding delivery/return transactions or modifying critical data. A message will appear when processing invoices to alert user to the conditions required for processing “live” invoices.

Copyright © Scaffolding Software

iRent® (Classic) : 8.88 (June, 2015)

End Of Month process option

There is a new setup option which allows you to automatically move all repairable items back into yard stock during the End Of Month process. The repairable items are handled as normal for billing and other purposes.



Delete branch enhancement

When a branch is deleted, all related records are purged as well, including all transactions. This feature is administrator password protected. An audit trail report is available for this action.

Copyright © Scaffolding Software

iRent® (Classic) : 8.87 (May, 2015)

iRent® backup enhancement

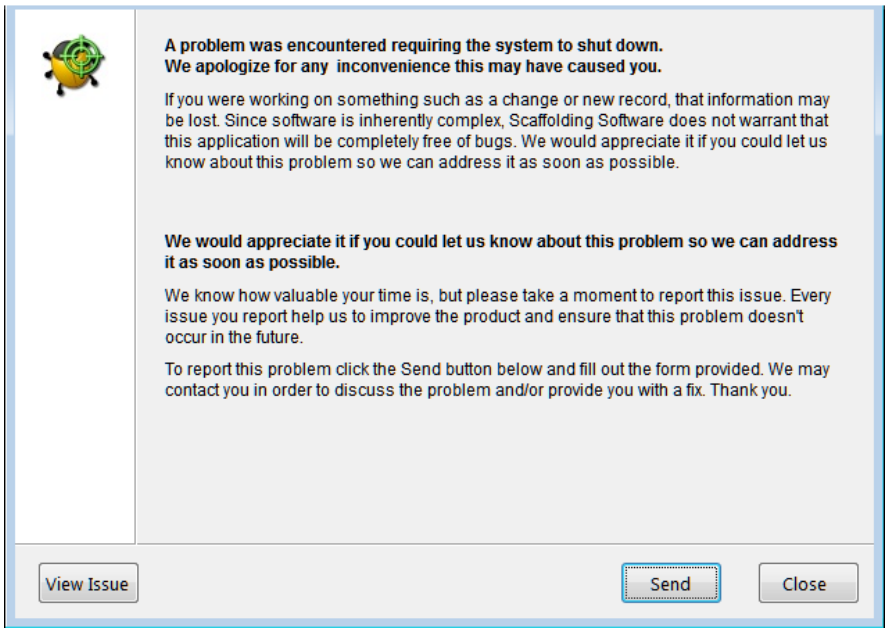
The iRent® backup process can now run on Windows 64 bit PC's.

Copyright © Scaffolding Software

iRent® (Classic) : 8.86 (April, 2015)

New error and bug report handling

If a programming error occurs, a new error window will popup and allow users to report the error message to Scaffolding Software.



Click on “View Issue” and copy and paste the details into an email to send to Scaffolding Software.

Copyright © Scaffolding Software

iRent® (Classic) : 8.85 (January, 2015)

Item Invoicing enhancement

Item invoicing now allows jobs that have a discount to include/exclude the job discount for each individual item on the invoice. This means that the job invoice layout can now be separated into sections as shown below.

This new feature is available for Invoice by Weekly/Daily rates and also compatible with the “rate per tonne” or “invoice by weight” options in iRent® (Classic).

See Stock rates form enhancement below.

Stock rates form enhancement

The stock rates form has been enhanced with a new column that flags if an individual item for a job that has a job discount to be treated as non-discounted for invoice purposes. Items that have a “N” for the “Apply Discount” column will not have the job discount applied to them when invoicing.

www.scaffoldingsoftware.com

Improved Integration

iQuote® can transfer the winning job to iRent®.

Users have the option of Accepting a winning job and it will be visible in iRent® with full contract information.

NEW MODULE - Jobs Dashboard.

If you are using iRent® "Live" which most of you are, we have a dashboard that allows logistics/job management for operations to help you manage transport, labour, and schedule inspections or any activity on a JOB.

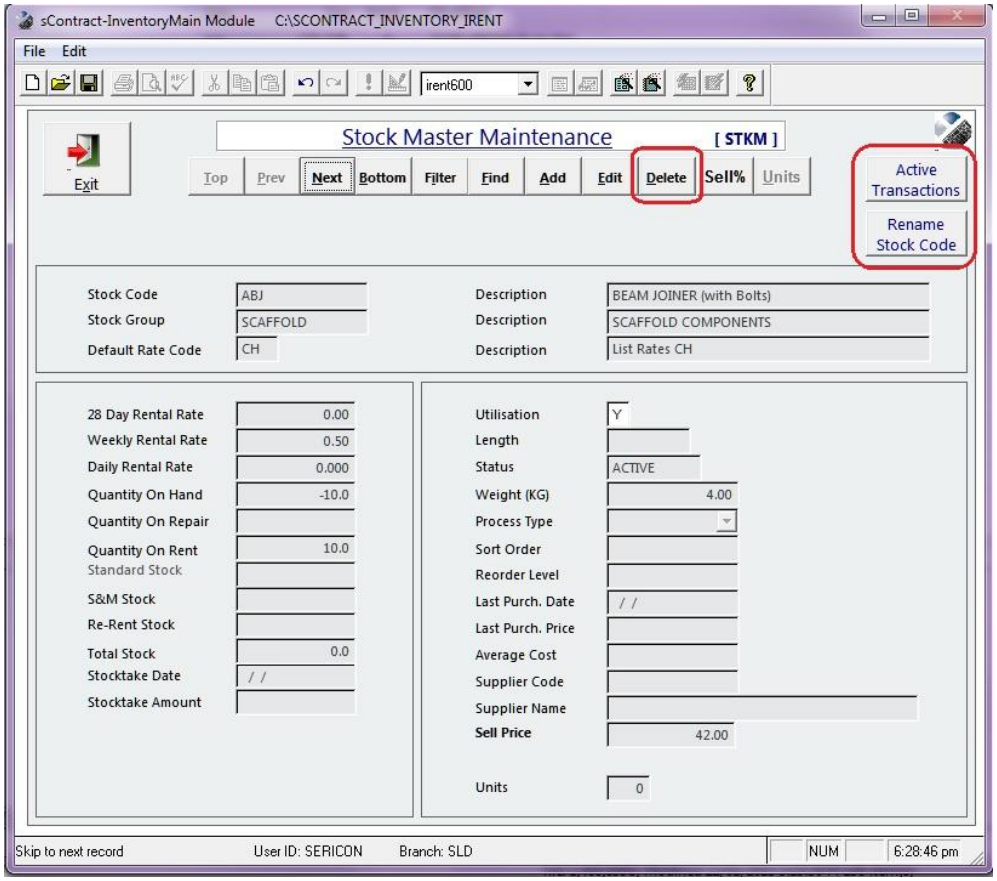
iRent® (Classic) : 8.83 (November, 2014)

Stock Master form enhancements

Added Delete item code option in stock master form - includes auditing (uses new admin password). An item code may not be deleted if it has “active” transactions.

Added rename item code option in stock master form - includes auditing (uses new admin password)

Added "Active Transactions report" to be used for the delete/rename item code options in stock master form. You can quickly see “active” transactions for the item code you want to delete/rename and then decide if you want to proceed.



Security enhancement

Report editor now requires admin password.

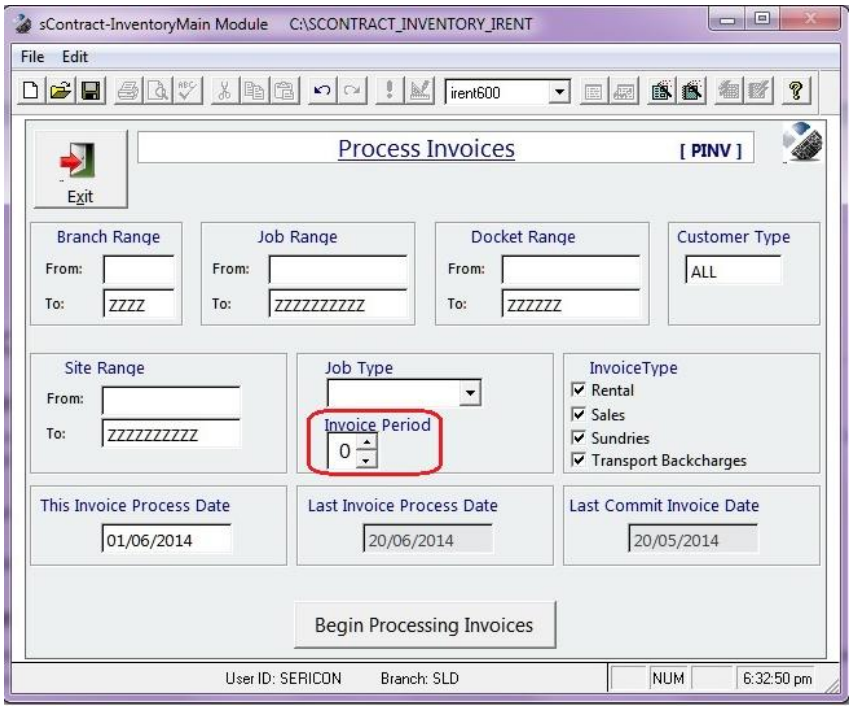
iRent® (Classic) : 8.82 (July, 2014)

Item invoicing enhancements

As well as being able to invoice by “Job Type”; “Invoice Period” has been added to the Job Details form as another level of custom filtering for job invoicing. The default invoice period is “0” and if this is selected then all jobs that have an invoice period of “0” (the default) are processed.



Improved Rate per tonne invoicing with total weight on invoice

Added a "Blank" option to Job Type in the process invoice form

New Job Weight Reconciliation report

Weekly job Revenue rate per tonne report - *Reports->Job Balances->Job Weight Reconciliation Report (Export to Excel)*

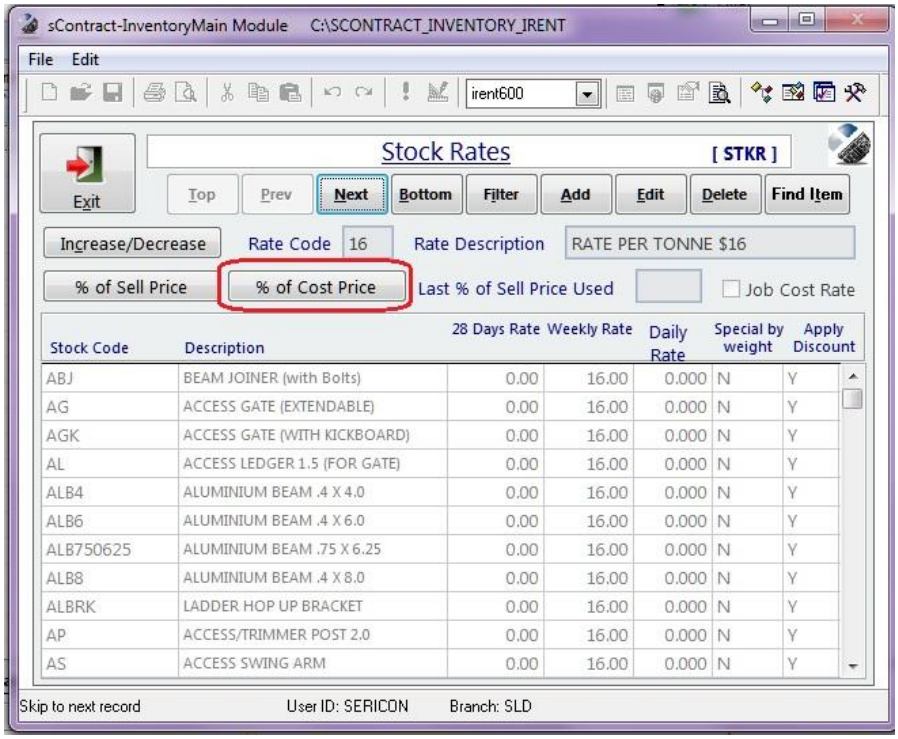
iRent® (Classic) : 8.81 (April, 2014)

Stock Master form enhancement

Improved Stock Master data entry Form.

Stock rates form enhancements

The Rates Form now allows you to create a rental rate based on Average Cost of components as well as Sell Price.

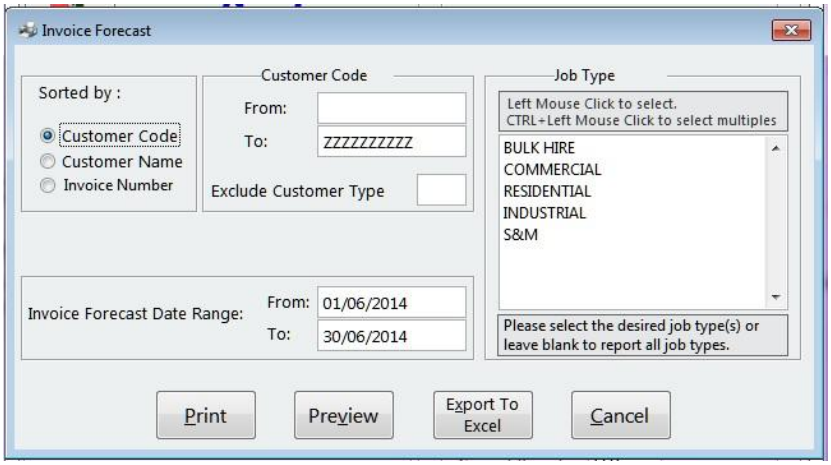


Copyright © Scaffolding Software

iRent® (Classic) : 8.80 (March, 2014)

New Invoice process summary forecast report

New Invoice process summary forecast report. If you invoice by item, you can now forecast this revenue in a detailed report. End of Month→Invoice Process Forecast Report



Enhanced user security system

Every menu item in the Main and Order processing Modules can now be customised to

Copyright © Scaffolding Software

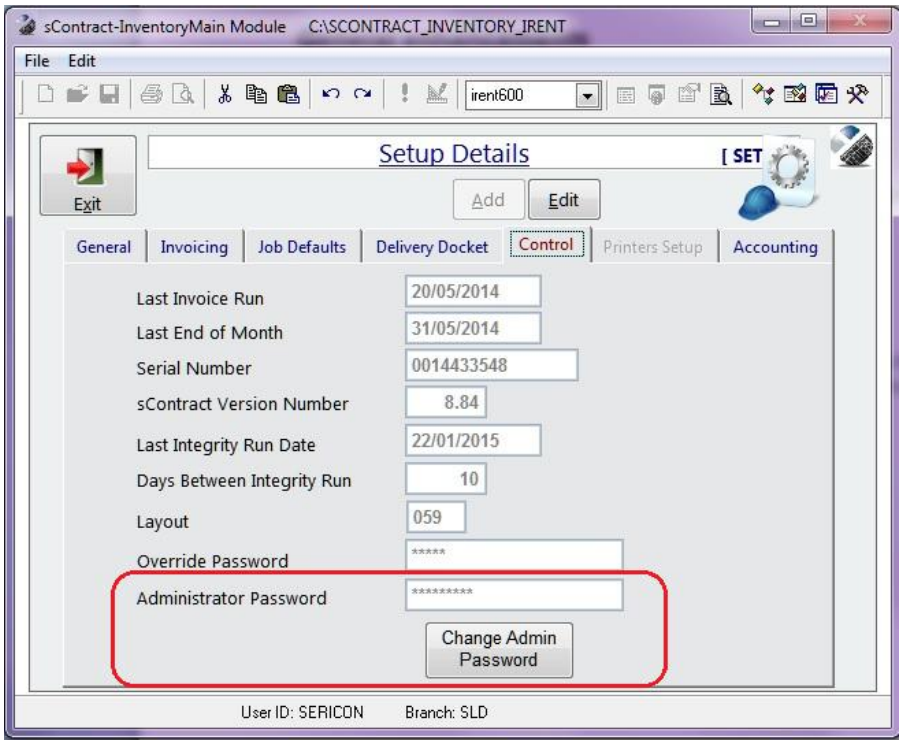
iRent® (Classic) : 8.79 (February, 2014)

General enhancements

Quantity on hand report item code range fix
Serial number fix
Main icon change
Some Font changes
Report designer changes
Enhancements to average cost added on the re-rent balances report including:
Average cost Multiplied x balance quantity shows on the report
Total by supplier of total average cost for each supplier
Grand totals at the bottom

New “Admin” password

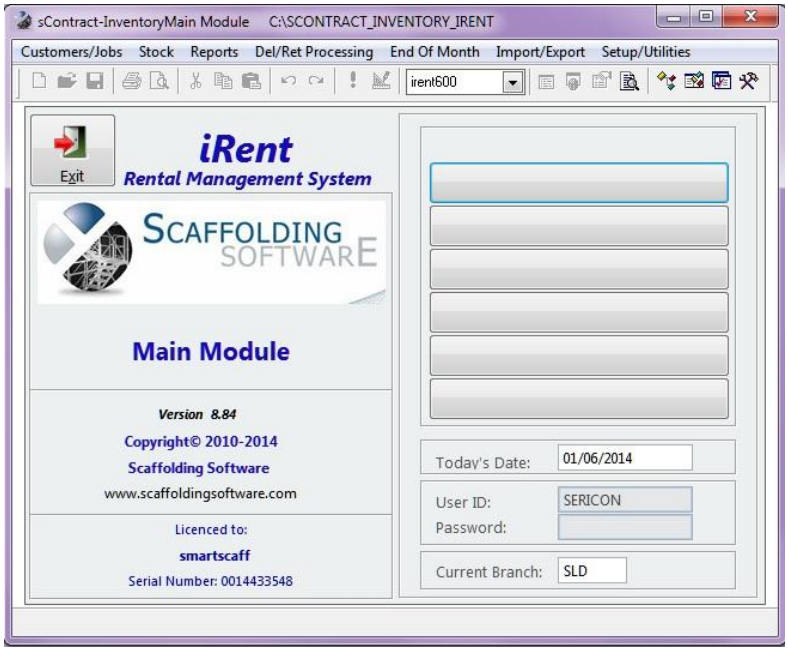
A new “Admin” password has been created in the control TAB of the setup form. This password is used for various admin tasks such as access to the report writer, renaming and deleting item codes, turning security on and is needed before you may change the admin password itself.



Enhancements to opening form

Including new layout, format, logo and icon.

Copyright © Scaffolding Software



Report enhancements

Added Weight column to "other stock balances" report with grand total.

Fixed Stock on hand report item code range issue.

Transaction summary report enhancement.

General enhancements

Changed font size in Report Editor disclaimer form.

Fixed "Add" sales rep issue.

New Scaffolding Software icons.

Allow the labour charge on the OPM delivery/return forms to handle 99,999.

Allow users to change the rate code on an existing quotation which changes all the individual rates on the quote.

Report enhancement

The Standard Job Balance report now allows you to subtract over returns from the total weight balance. Other Job Balance reports do not do this.

Update to integration for delivery and returns to “sContract – Design”.

Update for integration for delivery and returns to “Bizsync” – this is a full iPad inventory and transport booking engine integrated with sContract. This is an optional add on module available from a 3rd party. Additional charges apply for this feature.

Copyright © Scaffolding Software

New web portal

Web portal connection is now available as an add on extra for access via IIS Server. You may use the internet to access LIVE Job Balances, Dockets and Job Transactions. Additional setup fees apply if you require this optional feature.

Modification to the job discount field in preparation for ODBC web portal connector.

Advanced contracting enhancement

Add job description to LookUp browse in advanced contracting form.

Main Utilisation report enhancements

Created options to exclude Quantity “on repair” and “other” Quantity columns.
Created options to exclude zero Quantity On Hand and zero Standard Quantity values.

Item invoicing enhancement

Weight can be included on Straight Rental (Dry Hire) invoices and Sales Invoices.

Current Reports that export to Excel:

Reports->Item Reports->Stock List
Reports->Item Reports->Stock List by Weight
Reports->Item Reports->Current Utilisation Report
Reports->Job Balances->Job Value by State and Category
Reports->Job Balances->Current Job Balance Detail Report
Reports->Job Balances->Delivery Return History Table
Reports->Job Balances->Job Quote Item Balance Report
Reports->Job Balances->Job Weight Reconciliation Report
End Of Month->Sales Analysis->Sales and Rental Analysis

Report designer enhancement

Improvements to the internal report design system. Book in for a training session if you wish to modify your own dockets, sheets and invoices.

	Job totals	118	118		100	100	

Sales analysis report enhancement

Corrected the Sales Analysis duplicate Invoice/Job Issue.

Stock Master form enhancement

When adding a new item in Stock Master form it will default to ACTIVE.

Copy items utility enhancement

Copy Item Utility now has an ALL checkbox option.

System update for cameras

The system has been updated to handle Delivery IP Cameras in addition to Return IP Cameras with integration. Automatically attach digital photos of deliveries and returns to your dockets for added documentation to avoid disputes with your clients. (Setup fees apply).

Copyright © Scaffolding Software

Delivery docket enhancement

The delivery docket system has the ability to print a second internal sheet for each delivery showing the weight and rental rate for each docket. Very useful for your custom billing per docket or billing variations. (see samples)

New project form

New Projects form to handle advanced contracting jobs that involve multiple stages (jobs) which are controlled by a “master” job.
